Dear all,

The Intergovernmental Panel on Climate Change (IPCC) was established <<http://www.ipcc.ch/about/anniversarybrochure.pdf>> in 1988 by two United Nations Organizations, the World Meteorological Organization <<http://www.wmo.ch/>>\* (WMO)\* and the United Nations Environment Programme <<http://www.unep.org/>>\*(UNEP)\* to assess the scientific, technical and socioeconomic information relevant for the understanding of the risk of human-induced climate change. These reports are policy relevant but not policy prescriptive and are launched every 4-6years. The current Assessment Report (AR5), has the most recent and updated information on the climate system. The world is therefore currently more informed with regard to the science than was previously. The sixth assessment cycle has begun with the aim of producing the report around 2022.

IPCC therefore is inviting nomination of experts for consideration as CLA,LA, RE for its two special reports namely: Climate Change and Land ; and Oceans and Cryosphere.

As Kenya's IPCC focal point, I am bringing this to your attention so that you may consider contributing to these very important documents in any of the capacities already highlighted. Consequently I have attached for your information:

1. two letters from IPCC calling for nominations
2. Proposed outline (chapters) of each report
3. two excel files (nomination forms) which you can complete (either one or both) and select the chapter(s) you are willing to contribute to and under what capacity

Note: KINDLY CIRCULATE THIS TO MEMBERS OF YOUR INSTITUTION/DEPARTMENT WHO MAY BE WILLING TO CONTRIBUTE.

I will appreciate if I get the completed excel form and your 4 page cv on or before 12 May 2017 so that I start uploading them in order to beat the deadline of 17th May 2017.

My kind regards

\*Dr. Samwel N'Marigi, Ph.D\*

Kenya Meteorological Department

(Also IPCC Focal point for Kenya)
